Africa's Talking

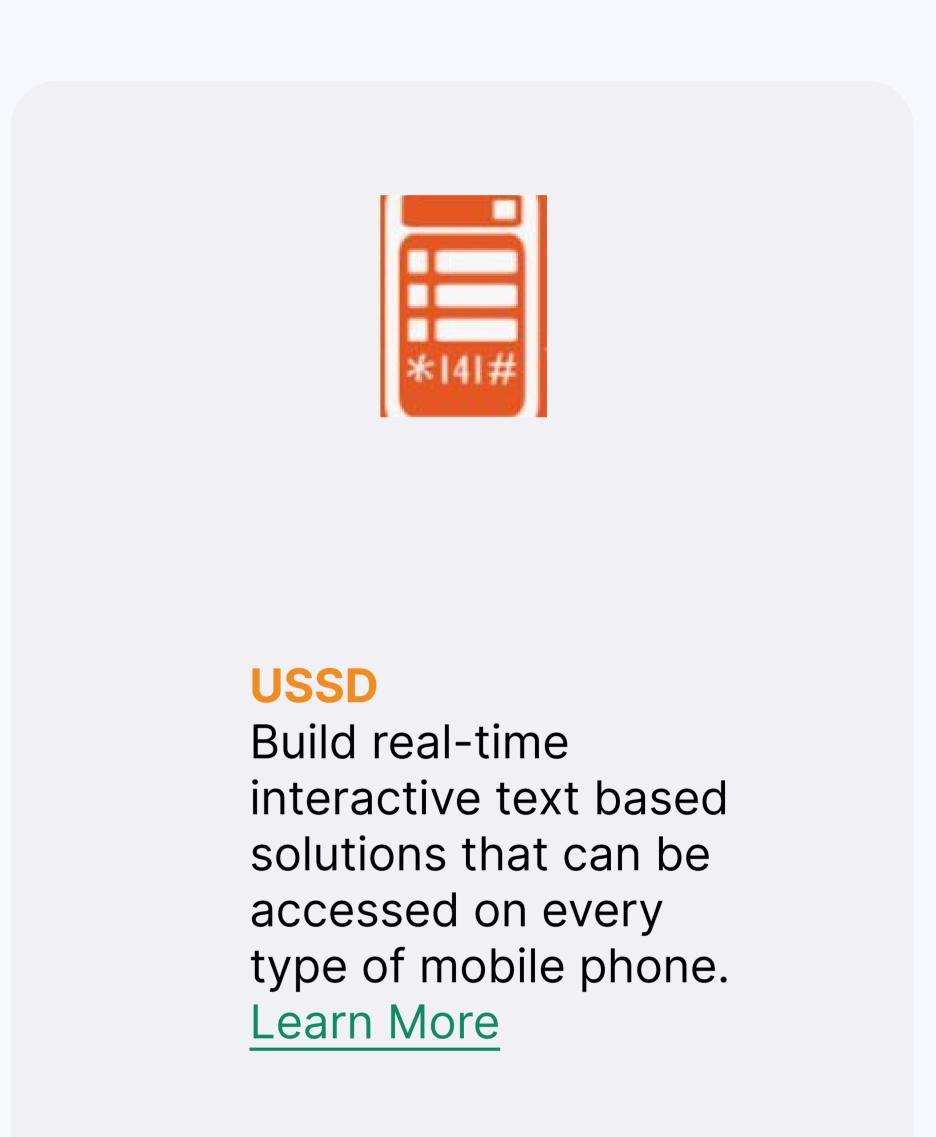

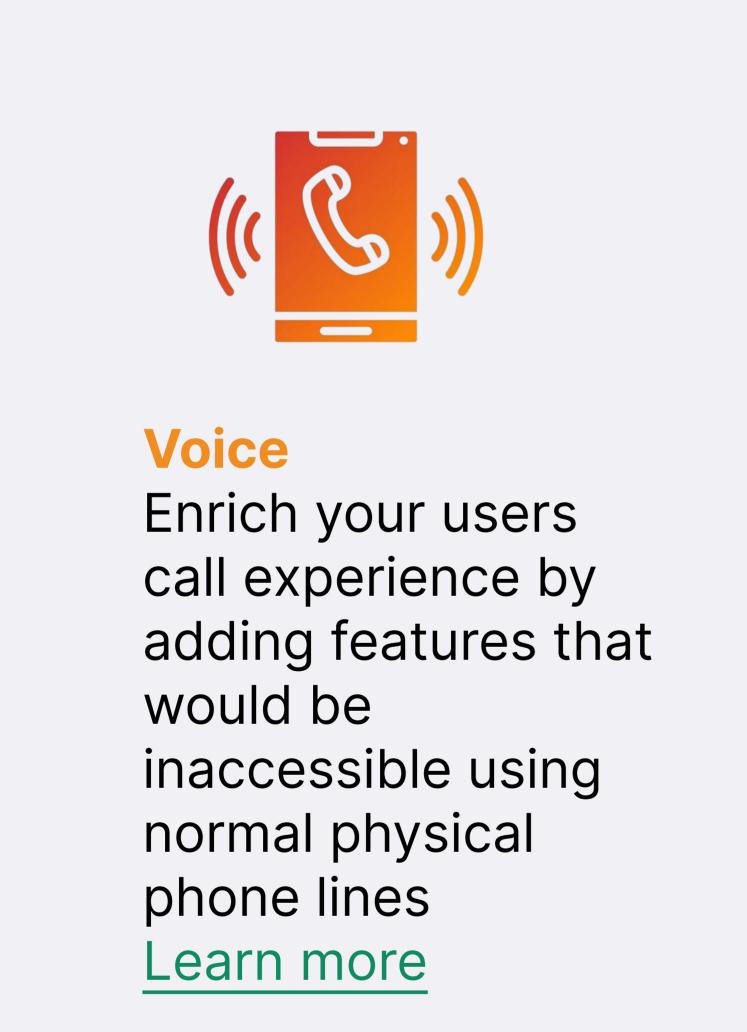

## Products

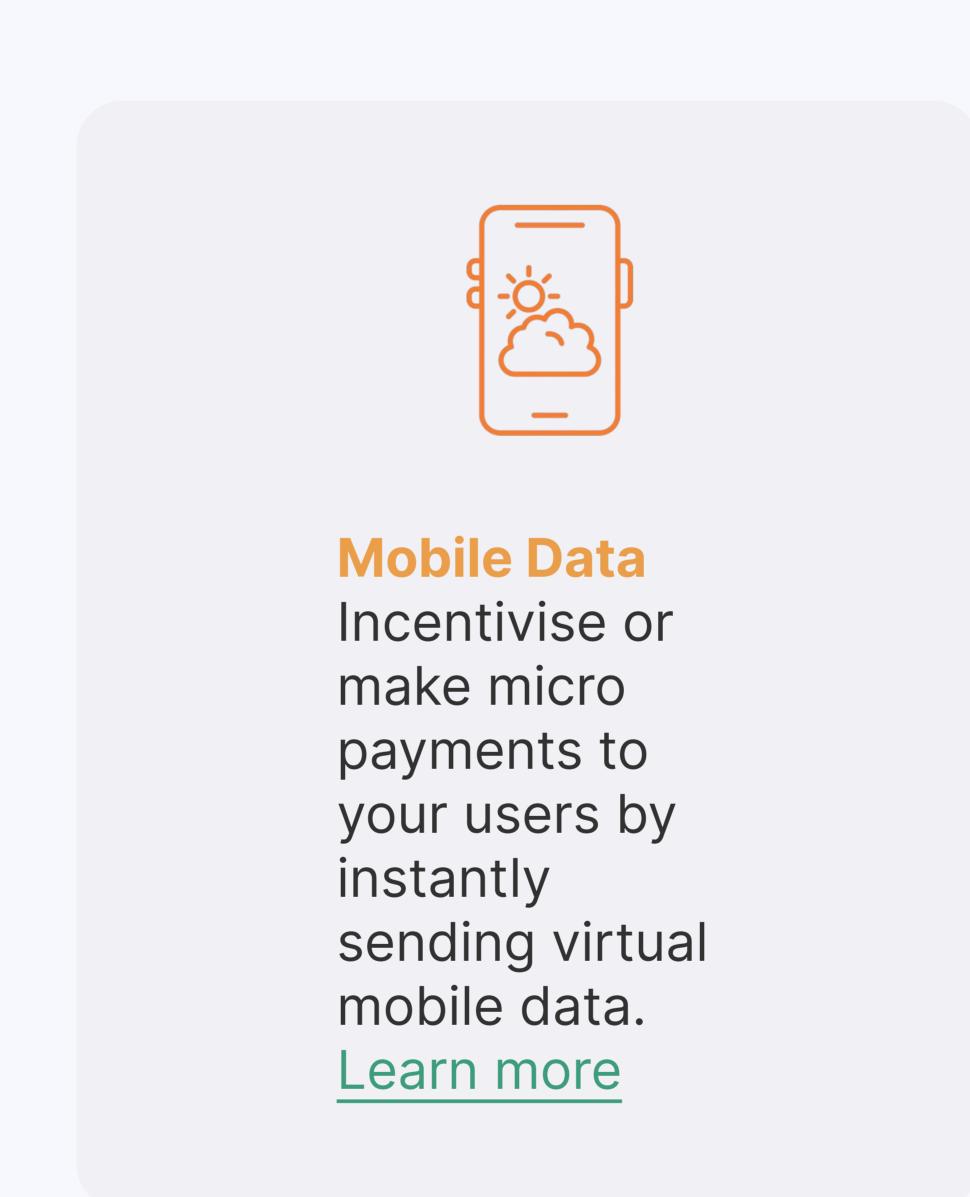

We provide a variety of communication and payments API products that are everything you need to build high-impact mobile engagement solutions. Our platform allows to you work on building superior customer engagement experiences without the complexity that comes from working directly with mobile operators.

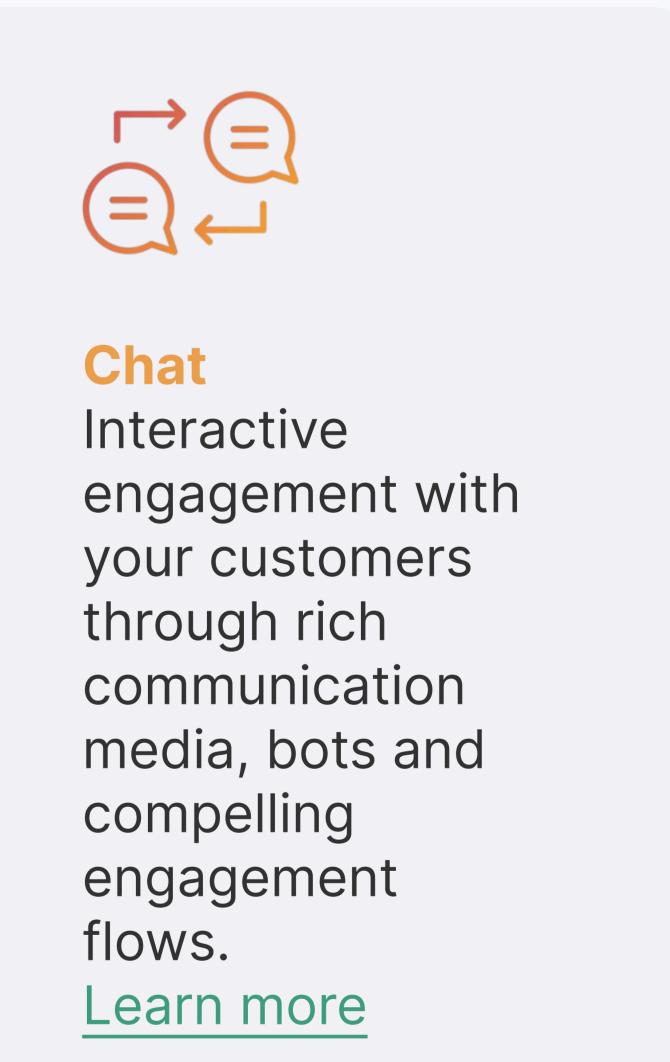

## **Transforming Customer** Engagement through Voice

James Odede, a developer in Kenya built Voice Memo, a web application that allows you to build your own customer call center. Using Voice Memo, you can connect with customers using various channels including inbound, outbound Voice and SMS. Using our fully featured Voice API, James has been able to build a platform that supports many businesses who are looking to enhance their customer engagement
